

Structures – CHOICE BOARDS

CHOICE BOARDS

Choice 1	Choice 4	Choice 7
Choice 2	WILD CARD	Choice 8
Choice 3	Choice 6	Choice 9

- are a common differentiation structure used to provide students with a choice of tasks. Students select one or more tasks to complete.
- may be used to help students learn (i.e., instruction and assessment) or as a way for students to demonstrate their learning (i.e., evaluation).

All choices address the same learning goal. Choices may be based on interest (e.g., a task related to sports, music, art...) or learning preferences (e.g., learning styles or multiple intelligences)

Clear assessment criteria are developed and shared with students prior to beginning the activity so that each 'choice' is assessed or evaluated in the same way.
